

DAYCO® HEAVY-DUTY PULLEYS

ENGINEERED FOR THE DEMANDS OF HEAVY-DUTY DRIVE SYSTEMS

Designed to replace idler and tensioner pulleys for serpentine belt drives in heavy diesel engine applications, Dayco heavy-duty pulleys are manufactured from robust materials such as steel, powdered metal, or engineered polymers to resist wear under harsh environments.

Providing long-lasting engine performance and protection against heavy loads, Dayco pulleys are built to go the distance. They are engineered using 3D computer-aided design and finite element analysis to guarantee optimal function and maximum structural integrity.

FEATURES:

- Dual permanently-lubricated sealed bearings and retainers provide long life under demanding shock loads
- Machined from high-strength steel or powdered metal material for excellent wear resistance
- High-temperature grease and seals ensure excellent bearing performance for long-lasting, quality service

BENEFITS:

- Effectively contributes to the restraint of misalignment and noise reduction for optimal on-the-road performance
- Performs well in any environment, no matter how harsh, reducing vibration for a cooler running belt
- Backed by Dayco's industry-leading warranty for heavy-duty parts - 50,000 miles or 24 months, whichever comes first
