

DAYCO® HEAVY-DUTY WATER PUMPS

ENGINEERED FOR THE MOST GRUELING TRAFFIC CONDITIONS

Dayco heavy-duty water pumps are OE engineered with cast iron blades, forged steel one-piece pulleys and case hardened bearings to ensure they meet the rigors of today's heavy-duty truck engines.

With application-specific coverage for more than 97% of today's commercial trucks, all Dayco water pumps meet or exceed OE specifications for fit, form and function and have been 100% end of the line leak tested.

These heavy-duty water pumps are completely new, not remanufactured, and with TS16949 certification, Dayco controls every quality aspect of production, from raw material out of the ground to water pump design and manufacturing.

FEATURES:

- Case hardened roller bearing designed with inside flex
- Unitized seals for excellent durability and less risk of contamination
- Cast iron blades for enhanced performance and increased longevity
- Improved impeller design utilizing metal in place of several plastic designs for better performance

BENEFITS:

- Includes all gaskets, seals and O-rings needed for installation, simplifying the job for technicians
- Meets or exceeds OE specifications for fit, form and function, including improved design in cases of high OE failure rate
- A name you can trust backed by an industry-leading 150,000 mile warranty
