

DAYCO® AUTOMOTIVE HOSES

HIGH-QUALITY PRODUCTS THAT MEET OE FIT, FORM AND FUNCTION

Dayco offers a full line of premium branded hoses for automotive applications that feature high quality materials and EPDM compounds.

All Dayco hoses are engineered with superior materials and technology to handle the highly corrosive and high-pressure environment they are exposed to.

Ensuring the safe and effective transfer of fluids or gasses, Dayco's line includes simple and branched hose applications for radiators, heaters, exhaust vents, fuel systems and more to ensure the best connection and performance.

FEATURES:

- Excellent hose flexibility and performance without flattening or collapsing
- Spiral reinforcement for high burst strength and excellent heat resistance
- Resistance to oil, mud, salt, road debris, ozone, coolants and temperature variations

BENEFITS:

- 150+ new applications being introduced that are exact replacements to OE fit, form and function
- Several branched hoses for high VIO applications provide an inexpensive alternative to OE hoses with the exact same fitment - no cutting or adjustments required
- Ongoing analysis of the entire product line, with new parts being offered or obsoleted to ensure proper fitment based on feedback from the field
