

DAYCO N.A. LAUNCHING 190+ HIGH VIO HOSE APPLICATIONS THAT MEET OE FIT, FORM AND FUNCTION INCLUDING 20 NEW BRANCHED HOSES

ROSEVILLE, MI, April 26, 2023 – Dayco, a leading engine products and drive systems supplier for the automotive, industrial and aftermarket industries, is overhauling its hose line after feedback from techs in the field. More than 3,000 current part numbers are being evaluated and almost 200 new applications, including a number of branched hose applications, are being launched throughout the year that are exact replacements to OE hoses.

“We are going through a very meticulous process to enhance our hose line offering. All new applications launched will meet OE fit, form and function,” said Jerry Reeves, head of Product Management for Dayco NA. “We are also reviewing older hose applications and eliminating or redesigning any hose that it not an exact application-specific fit using a high-tech process with 3D imaging and CAD software.”

Of the new applications being launched over the next several months, more than 170 part numbers are standard radiator and heater hoses that cover millions in VIO – all an exact fit when compared to the original equipment hose. Approximately 20 are branched hoses – which are much more complex in design – offering the aftermarket a much-needed alternative to expensive OE hoses for mostly 2016 and newer vehicles.

Dayco hoses feature spiral reinforcement for high burst strength and excellent heat resistance. They are engineered and formulated to handle exposure to oil, mud, salt, road debris, ozone, coolants and temperature variations, and designed to meet all relevant SAE standards. More information on Dayco’s hose line can be found [here](#).

About Dayco

Dayco is a global leader in the research, design, manufacture and distribution of essential engine drive systems and aftermarket services for automotive, truck, construction, agriculture and industrial applications.

Through its expertise in transferring power quietly and efficiently, Dayco has emerged as the leading global system solutions provider for hybrid electric vehicles. Dayco’s 100+ years of experience in drive systems allows the company to equip all customer applications around the world with the most effective drive systems to meet customer specific performance requirements. Dayco’s world class global distribution network services the aftermarket industry with a full offering of kits and products to meet each local market’s need. Dayco accomplishes this with a dedicated global team that respects one another, shows humility through continuous learning and acts like owners in everything they do.

Dayco has more than 40 locations in 22 countries and over 3,600 associates. For more information about Dayco, visit the company’s website at www.dayco.com.
