

# DAYCO® HEAVY-DUTY SERPENTINE BELT KITS

DRIVE SYSTEM COMPONENTS THAT PROVIDE MAXIMUM PERFORMANCE AND UPTIME

Extending time between service intervals, Dayco heavy-duty serpentine belt kits are OE-engineered to perform in the most demanding environments where safety and productivity are essential.

Dayco's kits cover millions of applications and include all the necessary components to ensure the belt drive system performs optimally – most importantly, its ability to handle higher torque and power pulses.

Each kit includes one premium tensioner, two heavy-duty dual bearing pulleys, and diesel-grade belts treated to increase flexibility, reduce rib cracking, and to run cooler.

## HD Serpentine Belt Kits Featuring 2-Piece Tensioner #89947

*Cuts installation time in half, creating more profit opportunities*

- More durable design with inner and outer tensioner that cuts install time 50%
- Developed for heavy-duty class 8 trucks with DD13, DD15 and DD16 series engines
- Helps solve significant installation problems existing with initial OE design

## HD Serpentine Belt Kits with OE-Designed Tensioners

*Reduces premature accessory bearing failure, extending system life*

- Designed for applications that require a highly engineered belt drive
- Addresses tension issues caused by fluctuation, housing separation, belt wear and stretching
- Helps prevent comebacks, reduce noise issues and enhance system performance
