

# HEAVY DUTY WATER PUMP

Dayco heavy duty water pumps are OE engineered with cast iron blades and have been 100% end-of-line leak tested. Designed with the latest technology, the heavy duty water pumps feature upgraded materials for the bearing, impeller and gasket. This expansion to Dayco's current product line offers a high-caliber component that carries the same quality as existing Dayco products.

## Coolant-Resistant Bearings

Optimized for each individual application and is capable of withstanding high rotation speeds and heavy loads.

## Low-Friction Seals

Prevents coolant leakage and provides a long service life.

## Cast Iron Blades

Ensures efficient coolant flow, provides higher performance, improved efficiency and reduced cavitation risk.
