

**TIMING BELT KITS WITH WATER PUMP
125,000 MILE EXTENDED WARRANTY PROGRAM**

Effective October 15, 2020

Dayco's Timing Belt Kits with Water Pumps are designed for the most popular applications, ensuring that you have all the parts needed to perform a complete repair job. Dayco kits are designed to meet OEM specifications for passenger cars and light duty trucks. Each of the water pumps is assembled using Programmable Logic Control (PLC), providing quality data during the manufacturing process. Additionally, each water pump features 100% new cast aluminum or iron material and meets TS16949 quality standards.

Applicable only when all products contained within the Dayco Timing Belt Kit with Water Pump are installed at the same time and according to the Original Equipment Manufacturer's (OEM) service instructions.

When you purchase a Dayco Timing Belt Kit with Water Pump (or a stand-alone Dayco Water Pump) and register your purchase [here](#), your kit will be covered for 125,000 miles (USA) or 201,000 kilometers (Canada). This extended warranty is contingent upon installation according to the OEM service instructions, including flushing the cooling system and installing new coolant that meets OEM specifications.
