INTRODUCING

Dayco Water Pumps

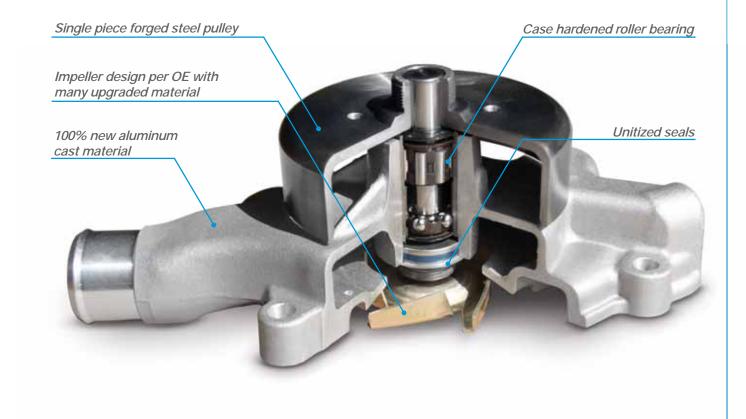

New Water Pumps from Dayco

Dayco water pump kits have been a reliable industry mainstay for years. Now that Dayco quality is available in stand-alone water pumps. Featuring upgraded materials for the bearing, impeller and gasket, Dayco water pumps deliver exceptionally reliable performance for over 200 million VIO, from vintage to the most recent models. Dayco ensures that high standards are met for every part supplied. From raw materials through the finished product, every aspect is validated for quality assurance.

Dayco water pumps are designed to meet or exceed OEM specifications. Superior design features include:

- TS16949 Quality Standard throughout the die casting, foundry, machining and assembly
- 100% new aluminum cast material, no recycled materials
- Case-hardened roller bearing with a tough exterior and an interior that allows for flex without breaking
- Single-piece, forged-steel pulley with no welds that can be weak spots

- Improved impeller designs for better performance and die-cast aluminum material for better durability and longer life
- Unitized seals for better durability and leak protection
- 100% end-of-line leak tested
